

## Implementing Ransomware Resilient Data Protection with HIPAA Compliancy

### SCENARIO

A Colorado based, regional healthcare provider was looking to safeguard its enterprise data from cyber attack (including Ransomware), create a streamlined data protection workflow that was holistically integrated with existing primary storage solutions (Production, Disaster Recovery and Cloud), and deliver a future-proof solution to support required service-level agreements and compliance requirements (including HIPAA - PII).

### KEY DRIVERS / REQUIREMENTS

- Deliver Web-Scale Architecture
- Enable On-Demand Visibility
- Optimized Workflows
- Enable Accelerated Data Recovery
- Ransomware Resilient
- Deliver Immutable Backup Solution
- Holistic Integration with Primary Storage (NetApp)
- Leverage Existing Investment in Primary Storage (NetApp)
- Scalable to Support Large Data Growth
- Deliver to Operational Service-Level Agreements
- Achieve Business Compliance

### SOLUTION

PEAK delivered an immutable, software defined, service-level driven, web-scale architecture comprised of Rubrik Polaris GPS and NetApp. This expansive and scalable, enterprise-class solution provides an on-demand portal to unify all metadata, mitigates data risk, accelerates ransomware recovery options, achieve business compliance while providing fully integrated workflows, maintainability, and visibility throughout the complete storage infrastructure.

### KEY SOLUTION TECHNOLOGIES

Rubrik Polaris GPS  
NetApp

## Data Protection

### About PEAK Resources

PEAK Resources is an innovative technology and systems integrator focused on the next generation of Data Center designs. We are experienced technologists who help clients align business drivers and requirements to the right solutions and services.

We have deep knowledge of the contemporary data center landscape including traditional (on-prem), cloud, hybrid, converged, and hyperconverged architectures. We combine this with a diverse set of core offerings that include architecture, integration, implementation, management, and just-in-time logistics.

Established in 1991, PEAK is proud to be the most awarded technology solutions provider in the Rocky Mountain Region.

FOUNDED IN 1991
